The International Journal of Microsimulation (IJM) is the official online peer-reviewed journal of the International Microsimulation Association. The IJM covers research in all aspects of microsimulation modelling. It publishes high quality contributions making use of microsimulations to address specific research questions in all scientific areas, as well as methodological and technical issues. The IJM welcomes contributions of research articles, short research notes, data watch notes, book reviews, and software reviews. See the journal website for further details.

Editor: Matteo Richiardi, University of Essex, United Kingdom

Book Review Editor: Gijs Dekkers
Associate Editors: Francesco Figari, Jakob Grazzini, Sophie Pennec, Azizur Rahman, Luc Savard, Deborah Schofield, Sven Stöwhase, Gerlinde Verbist, Eveline van Leeuwen, Jürgen Wiemers
